

# Britex Troughs

As Britex stainless steel troughs are designed for ease of cleaning and added safety, they are commonly found in schools, practical activity education classrooms, hospitals, medical facilities, and other high traffic areas.

Britex also has a range of accessible drinking troughs that are AS1428 compliant and suited to wheelchair access. We also have a range of troughs that conform to the NSW and the SA departments of education standards, making these ideal for use in schools and kindergartens.

## Britex Stainless Steel Troughs

Whether you are looking for drinking troughs, hand wash troughs or sinks, foot wash troughs, practical activity troughs, art troughs, lockable outdoor learning troughs, screen print troughs or surgeon's scrub troughs, we have a range of options to suit specific project applications.

Our drinking troughs include pre-plumbed water efficient push button drink bubblers with bacteria and sunlight resistant rubber compound mouth pieces, for safety and hygienic purposes.

Britex can supply standard and customised troughs, with or without tapware.

If you need customised stainless steel troughs to suit your project requirements, please contact our team directly today.
